The Aqua Technics Pools story

Aqua Technics Pools have been manufacturing award-winning fibreglass pools for over 48 years. We have the best range of technologically advanced swimming pools, which are manufactured in our purpose-built production facility.

Over forty eight years on we are still a family owned and operated company. Our pools are built to stand the test of time and are distributed all over the world. Our ultimate goal is to ensure families will enjoy their swimming pool and create a lifetime of happy memories.

We manufacture the very best fibreglass pool available anywhere in the world. Built to look better and last longer than any other.

International award-winning designs

Aqua Technics Pools are a multi-award winning swimming pool company with over 23 International Awards of Excellence – proof that the quality of our pools are recognised the world over.

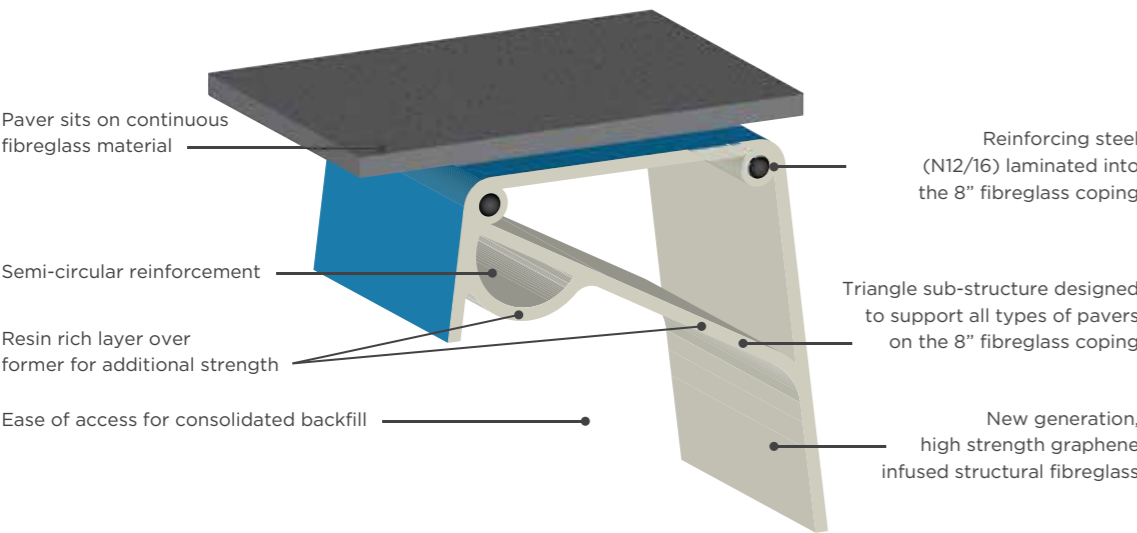

Built stronger to last longer

Aqua Technics swimming pools are purpose built to withstand the test of time. Take a look beyond the surface and you'll discover a level of quality that is distinctly Aqua Technics.

Each pool is manufactured using new generation, high tensile strength, eco-friendly fibreglass. Superior design features built into our pools provide additional structural strength. A reinforcing ribbing system supports the shell walls while struts under steps and bench seats ensure they remain level with the rest of the pool.

Why we only build pools with 8" edge beams

The design of the 8" wide edge beam means the strength is engineered into the pool - your pool is built stronger to last longer.

What sets us apart from the rest

Our state-of-the-art manufacturing facility includes an in-house raw materials production division. This allows us to freshly batch our raw materials on a daily basis, which is extremely important in order to produce a superior quality product.

Our pools are manufactured in accordance with a Quality Management System as per the requirements of International Standard ISO 9001. We are measured and tested by an authorised, independent external auditor each year. We are 1 of only 5 companies globally with International Code Council Accreditation - ICC-ES.

The strength and quality of our pools are backed by our Extended Lifetime Structural Guarantee.

Shipped all over the world

The quality and strength of our pools is the reason they have been shipped to 16 countries world-wide, many of which we have been active in for over 15 years.

We pride ourselves on having an innovative range of designs, colours and surface finishes. We have been leading the industry in product technology and development to ensure every Aqua Technics pool is superior in every way.

Superior Pool ColourGuard®

Only Aqua Technics Pools can offer you a patented surface protection system for fibreglass pools that resists the effects of ultra violet rays and chemicals. It's like sunscreen for your pool, protecting it from colour loss and weathering. Incorporating a specialised dual coat system as part of the manufacturing process, two layers are merged to provide extraordinary surface protection.

With a brilliant, high gloss finish that lasts, your Pool ColourGuard® pool will maintain its beautiful appearance year after year. We dare you to compare.

The greatest advancement in fibreglass pools in over 48 years

Dual coat system - every layer matters

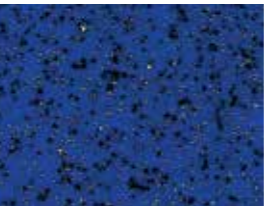

- 1 First layer with clear gelcoat technology - acts like sunscreen for your pool
- 2 Colour layer - colours that last longer and act as a corrosion barrier to prevent osmosis
- 3 First structural layer and second chemical resistant layer - double protection
- 4 Graphene infused ceramic composite core
- 5 Graphene structural composite layer - stronger and stiffer
- 6 Graphene structural composite over reinforcing formers creating increased strength and stiffness
- 7 Graphene infused ceramic composite outer membrane

Only specialised resins are used, no general purpose resins.

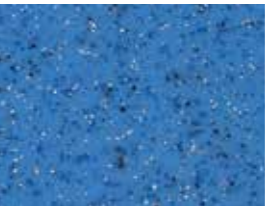

When only the best will do - the world's first fade-resistant surface protection system for fibreglass pools

Ground-breaking Graphene Nano-Tech

Innovative technology in fibreglass pools

Graphene Nano-Tech is a revolutionary process infusing graphene nano technology in every Aqua Technics pool. Over 4 years of research and development has been carried out to incorporate graphene into the structure of our pools, creating a totally new patented construction process that is the next generation of fibreglass pool technology.

Graphene is the strongest material known to man. It is over 200 times stronger than steel and stronger than titanium. Infuse it in our pools and you get our strongest pool ever, built like no other. Quality that you expect with an Aqua Technics pool.

Our promise to you
– there simply is no
better swimming pool

A new generation of swimming pools designed and engineered like no other

Used in swimming pools, graphene nano technology enhances the characteristics of the fibreglass laminates and has the following benefits for our pools:

30% stronger

- Graphene is over 200 times stronger than steel and stronger than titanium, giving you our strongest pool ever
- Increased strength and rigidity of the pool's structure
- Higher impact and flexural strength

30% lighter

- Graphene is surprisingly light, giving our pools exceptional strength without added weight
- Our new technology reduces weight while improving rigidity and flexural strength
- Pools are stronger without being heavier
- Lighter for transport and crane lifts

Higher resistance

- A Graphene Nano-Tech pool has a higher resistance to water and moisture transpiration and chemicals
- Increased laminate durability
- Improved corrosion barrier

Our innovative **POOL RANGE**

Create your own piece of backyard paradise with the Istana.

Istana Features

- Extra long entry steps in the shallow end for easy access
- Wider second entry step creates the perfect spot to sit and relax

Delta Blue

Step into the cool water of the Terazza and swim your worries away.
